**BULLETIN
OF THE
NORTHERN NORMAL AND INDUSTRIAL SCHOOL
Aberdeen, South Dakota**

THE LIBRARY OF THE
SEP 29 1932
UNIVERSITY OF ILLINOIS

GUIDANCE BULLETIN
How to Select and Follow a Curriculum
at the
**Northern State
Teachers
College**

Entered as second class matter June 27, 1907, at the postoffice at Aberdeen, South Dakota, under Act of Congress of July 16, 1904.

Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October, 1917, authorized July 13, 1918.

Volume XXV

May, 1932

No. 7

PURPOSE OF THIS BULLETIN

This bulletin is designed to answer many questions which students ask concerning the selection and pursuance of the various curricula offered at the Northern State Teachers College. It has been prepared by the Committee on Curricula with the assistance of the heads of departments with the view of providing helpful suggestions to students in selecting curricula, and with the view of assisting students to meet requirements for graduation as stated in the general catalog.

This bulletin in no way replaces or supercedes the requirements for graduation given in the general catalog. In fact, it is an identical statement of those requirements in abbreviated form, together with suggestions for meeting them. In so far as possible, requirements and suggestions are differentiated. The general catalog may be consulted in case of doubtful meaning.

It is hoped that the bulletin will prove to be genuinely helpful to both students and faculty advisors.

Curricula

HOW TO USE THIS BULLETIN

Examine this bulletin carefully before deciding upon a Curriculum. It is especially important to select, at the outset of your college career, the curriculum which offers to you the greatest possibilities for success and happiness.

How to Select a Curriculum. Before selecting a curriculum two things should be decided: (1) the length of time you can attend college before you must seek a teaching position; (2) the type of school in which you desire to teach, one-room rural school, kindergarten-primary grades, intermediate grades, junior high school, or high school. Regardless of the type of school you select, it is advantageous to remain in college as long as possible in securing your initial preparation.

Students who expect to attend college one year only should select the **One-Year Rural Curriculum** found on page 6. This curriculum leads to the **First Grade Elementary Certificate**.

Students who expect to attend college two years may choose one of the following curricula:

Upper Grade Education (See page 7).

Intermediate Grade Education (See page 7).

Kindergarten-Primary Education (See page 8).

Rural Education (See page 9).

These four curricula lead to the **State General Certificate**.

By attending college two years and two summer terms the student may complete one of the following **special curricula**:

Art (See page 10).

Music (See page 11).

Industrial Arts (See page 12).

Physical Education for Women (See page 13).

These curricula lead to the **State General Certificate** and prepare the student to teach the special subject in Grades I-VIII.

Students who expect to attend college four years should select one of the following curricula:

High School Education (See pages 14 to 35).

Special Curriculum in Industrial Arts (See page 22).

Junior High School Education (See page 36).
Intermediate Grade Education (See page 37).
Kindergarten-Primary Education (See page 38).
Rural Education (See page 39).

These curricula lead to the degree, Bachelor of Science in Education.

How to Follow a Curriculum. Three types of courses appear in the Outlines of Curricula in the following pages: (1) Required Courses, (2) Suggestive Courses, and (3) Elective Courses. After a curriculum has been selected it is imperative that the student enroll in the **Required Courses** (the courses printed in capital letters) during the quarter in which they are listed in the **Outline** of the curriculum. Any violation of the order of the courses breaks up the continuity of the curriculum and interferes seriously with the student's work. Furthermore, it may cause the student to extend the time required for completion of the curriculum. **Suggestive Courses** (the courses printed in small letters) may be omitted only with the consent of the student's faculty advisor. The faculty advisor should be consulted in the selection of all **Elective Courses**.

Substitution for Required Courses may be made only on advice of the student's faculty advisor, and with the consent of the Registrar and the heads of the departments concerned. In general consent for making substitutions must be obtained before enrolling in the course to be substituted.

After a student has definitely selected a curriculum, a record of his choice should be filed with the **Registrar**, who will furnish forms for this purpose. If a student desires to change from one curriculum to another, permission should be secured from the advisor of each curriculum and a notice of his intention filed with the **Registrar**. In case of changing curricula, adjustment to the new curriculum may necessitate the extension of time and the postponement of graduation.

How to Obtain Advice. The name of the **Faculty Advisor** for each curriculum is given in connection with the Outline of the Curriculum. After a curriculum has been selected, the faculty advisor for that curriculum becomes the student's personal advisor in all matters pertaining to the curriculum.

The **Registrar** will also advise students by indicating the requirements which must be met in completing curricula. He will furnish, upon request, a statement of the amount of

work and the required courses the student must complete before graduation.

The Responsibility of the Student. The student is primarily responsible for pursuing the curriculum as outlined in this bulletin. The faculty advisors and administrative officers will make every effort possible to advise students correctly. However, the college will not assume responsibility for loss of time caused by the student's failure to follow a curriculum, as outlined.

FOUR-YEAR CURRICULA LEADING TO THE DEGREE,
BACHELOR OF SCIENCE IN EDUCATION

Requirements Applicable to Four-Year Curricula

- A. Required Sequences.** The following sequences of courses are required of all students. These sequences must be taken during the first two years of all four-year curricula.
1. Science, 12 hours credit, or Algebra and Trigonometry, 10 hours credit.
 2. History, 10 hours credit; Sociology, 5 hours credit.
 3. Psychology 201-A, B, 6 hours credit.
 4. English 201-A, B, C, 9 hours credit.
 5. Physical Education 201, 6 hours credit; Individual Hygiene, 2 hours credit.
- B. Special Requirements.**
1. Every student must present a minimum of 36 hours credit in Education and Psychology, including the required courses listed in the student's curriculum. Students who transfer from a two-year curriculum to a Four-Year Curriculum in High School Education, are required to present a minimum of 36 hours credit in Education and Psychology, not more than 17 of which may be taken in the junior college. Professional credit earned in the junior college in excess of 17 hours will be forfeited on transfer to a Four-Year Curriculum in High School Education.
 2. At least two-thirds of the work taken in the last two years must be of senior college grade (courses numbered 300 or above.)
 3. All courses appearing in capital letters in the **Outline** of a Curriculum must be included.

4. Application for practice teaching must be filed with the Dean of Instruction or the faculty advisor at the beginning of the fall quarter of the senior year.
5. All students must satisfy the specific requirements in teaching majors and teaching minors, as indicated in descriptions of curricula in the general catalog.
6. In addition to other requirements the student will elect enough courses to make a total of 186 hours credit. Not more than 27 hours credit may be elected in technical subjects such as Commerce, Industrial Arts, Art, Music, Physical Education, etc., by students not specializing in technical fields.

Suggestions for Selecting Teaching Majors and Teaching Minors

- A. The selection of teaching majors and minors is not a mere matter of quantity, but of the selection of an orderly sequence of courses which will best prepare the student to teach the subjects selected.
- B. Since majors and minors in some departments are based upon prerequisites, the student should select major and minor departments at the beginning of the sophomore year if possible.
- C. By the beginning of the junior year, preferably sooner, the student should indicate his selection of major and minor departments to the Registrar. Forms for filing this record may be secured at the Registrar's Office.
- D. The teaching major and teaching minors should be selected with the view to obtaining a suitable combination of subjects for teaching purposes. Suggestions for desirable teaching combinations are given in the lists which follow. The first list indicates two-subject combinations occurring most frequently in the "South Dakota Directory

of Secondary Schools," published by the State Superintendent of Public Instruction for the school year 1931-32. The second list contains the three-subject combinations occurring most frequently in the same directory. So many three-subject combinations occur that it is difficult to make desirable selections. The list contains all the three-subject combinations which occur as many as five times in the Directory. The subjects are not arranged to indicate majors and minors but to show desirable teaching combinations. In selecting majors and minors, it is preferable to choose a major in accordance with one's interests, without referring to the lists, and select a desirable two-subject combination. Finally, add to the combination a third subject which appears to make a suitable teaching combination.
